

The Shadow Robot Company

- Shadow is a UK SME, and have been developing robotic hardware and systems since 1987.
- Shadow provides state-of-the-art hardware for research customers:
 - NASA
 - Bielefeld (DE)
 - Carnegie Mellon (US)
 - Leeds (UK)
 - Hughes Research (US)
 - Ohio (US)
 - Maryland (US)
 - Cartagena (ES)
 - ESA (EU)

- Shadow has a record of innovative research collaboration:
 - FP7 – HANDLE, PV-S, TACO
 - FP6 – CLAWAR
 - EPSRC – Emergent Objects
 - DSTL – Towards Shirtsleeves EOD

- Shadow is actively engaged with current robotics research issues for defence, medical, assistive, and space applications.

Shadow and ECHORD

Shadow can provide:

- Hardware (Dextrous Hand, Biomorphic Arm)
- Research goals
- Future end-user take-up of research
- Insight and involvement in research problems
- Development of new hardware
- Adaptation of existing hardware

Shadow produces state-of-the-art hardware to customer needs and participates in project R&D. Either as a supplier of components, or as a project partner, the Shadow team offers ideas and innovation to your project!

Shadow is actively seeking research partners who want to take their innovations into the real world
